## The "Tool Box"

As we approach the half way mark of 2013, there have already been a lot of changes since our January newsletter. We can confirm we have contracted with Lamar Construction to build our new facility on the lot just South of our current location. This building will be dedicated to our All Phase Hydraulics division. They have experienced tremendous growth, as have all the other divisions, and we have simply run out of space in our building and the parking lot. This new building should relieve some of that congestion.

We hope to have the building up and operating by January so when the busy spring season begins in 2014, we will be ready to service the needs of you, our customers, even BETTER. Feel free to stop in or drive by and watch as we progress through this building project. Just as we are interested in your business, we appreciate your interest in ours, and welcome any suggestions or ideas for improvement. Thank you!

~ The Management

## Wheelchair Lifts - - - - -

Speed Wrench is an authorized repair facility for Braun and Ricon wheelchair lifts. In order to keep up with demand and ensure our customers receive back their wheelchair equipped vehicles in a timely manner, we've recently sent more of our technicians to training classes for certification in wheelchair lifts. We can service and repair the lifts in our shop or come to your location.

Why drive all over town when one of our service trucks can come directly to you?

**\*\*Call Scott Moelker at 616-669-8777 for motor home and RV oil changes, brakes, suspension, electrical, lighting, no start issues, A/C service and winterizations either in our shop or at your location. We also service generators!**

### "your motor home specialist"

**A new face to the Light Duty Division!**

**Michael Wilcox - Technician:** We welcome our latest new hire, Mike Wilcox. Mike joined the Light Duty division in April of this year as a shop technician. He attended Coopersville high school and Grand Rapids Community College. In his spare time, Mike enjoys working in his garden, going camping and restoring his Dad's 1957 Belair! **Welcome to the team!**

## EZ Line Laser Wheel Alignment Tool - - - - -

The EZ Line Laser Wheel Alignment Tool is a new item that we are looking at for alignments. It is a simple easy tool that allows us to check your trucks and buses for alignment problems. It can be done on any shop floor with your truck loaded or unloaded. There are 4 easy steps and the whole check can be done in about 10 minutes. This check will let us know if you need to get your vehicle aligned, which in turn will help you get more life out of your tires.

Call 616-669-8700 and talk with Chris to schedule your alignments!

**Below is an oversized crane truck we recently had the opportunity to align!**

**Please welcome our most recent hire:**

We would like to introduce you to the Heavy Duty's newest mechanic, Jordan Kaptein. He joined our team in March, 2013. He recently graduated from Unity Christian High School and Ottawa Career Tech Center. Jordan resides in the Hudsonville area, which is nice for him because it is only a short ride to work. When he is not at work, he spends his time fishing, duck hunting and wrenching on his own vehicles!

## **Body Shop Division**

- ➔ Summer is here yet again and all that can be seen in the parking lot is black and yellow! With school shut down for the summer, our division is filling up with buses for repairs. If you have not already made the arrangements, we would suggest you do so soon because the open slots are filling up quickly!
- ➔ We specialize in bumper to bumper, floor structure to roof repairs that you may need, and we do it with the service and respect you would expect. To all repeat customers, we would like to take a moment and say thank-you for the trust you have in us. For potential new customers, thank-you for considering us and we look forward to serving you!

## MRC Conference 2013

➡ The Michigan Recycling Coalition's Conference gets better every year. This year the show in Bay City highlighted the MRC's new recycling marketing campaign, Recycle, MI. We can all be a part of Recycle, MI with your help.

➡ More than 250 recycling professionals gathered in Bay City to learn, share and network about all things collecting, processing and using recycled materials. More than 40 exhibitors provided information about recycling equipment, services, products and programs. The event is not to miss if you make your living off recycling in Michigan.

➡ Speed-Tech has been thankful to be part this great organization for past years. We appreciate you, our valued clients and look forward to working with our new friends we continue to meet each and every year. Please keep us in mind for your equipment and service needs.

We hope to see you next year in Ypsilanti at the Eagle Crest Resort. This will be a fantastic event once again. Put it on your calendar: **April 29, 30 and May 1<sup>st</sup>.**

## Featured Project:

➡ Summer is finally here and the weather is warming up, the shop and install work is following suit, heating up more and more each day.

➡ We recently finished a custom fabrication of a large platform / sheet metal enclosure system in our shop. Our crew installed it at the customer's site with a hydraulic tipper. This material handling equipment system is designed to manage recyclable materials. It's intent is to effect an area very important to all of our clients; your bottom line! Clients who wish to save money are looking to recycle more scrap product to reduce and lower their landfill disposal fees. This project, along with many others keep our shop and installation crews very busy!

# All Phase Hydraulics & Machine

## Meet the new faces working in All Phase!

➔ In the past few months our division has continued to stay busy, and the work continues to come in. In order to continue keeping up with demand, we are continuing to hire. Jason Bertsch has been hired to help us out in the shop, cleaning and assisting the other shop technicians. Also, Mike Nind has come on board to help assist in quoting the repair work as it comes in.

**William Michael Nind** - Born and raised in the little town of Free Soil, MI, Mike comes to us with over 15 years of experience in remanufacturing hydraulic components. He spent the last 6 of those years as a shop foreman for Abbot Hydraulics where he managed the technicians, and scheduled and quoted work. In his free time he enjoys to go out in the woods to hunt, fish, camp and ride ATVs. We were thrilled to have Mike join our team this past May.

**Jason Bertsch** - We at All Phase would like to introduce one of our newest employees, Jason Bertsch. Jason is married to Tarah and they have three children. Upon hearing about the job at All Phase, Jason decided to leave his job of driving truck. When he is not at work, he spends his time fishing and hunting. Welcome to the team Jason!
